---

TO: LSCSD BOARD OF DIRECTORS  
MEETING DATE: March 28, 2018  
FROM: Robert Moser, Public Works Supervisor  
SUBJECT: Sustainable Groundwater Management Act

---

BACKGROUND:

The Sustainable Groundwater Management Act, or SGMA (Sigma), was signed into law in September of 2014. The law was written in response to critical groundwater depletion in the Central Valleys and coastal areas of California. It identified and prioritized groundwater basins in the state.

The law provides for the formation of Groundwater Sustainability Agencies (GSA) in each basin. The goal is local responsibility to determine and mitigate risk. The Siskiyou County Flood Control and Water Conservation District is the designated GSA for the Shasta Valley Basin.

The GSA is responsible for developing a Groundwater Sustainability Plan by January 31, 2022. This plan must assess the current and future condition of the basin, and establish management, monitoring and long term goals for the basin.

SGMA provides for local input and control. Only stakeholders within the boundary are eligible for seats on committees of the GSA. Exclusion from the boundary \*may\* result in a loss of local control

Today, we have Matt Parker Natural Resource Specialist with Siskiyou County to talk more about the current basin within Shasta Valley.

RECOMMENDATION:

The decision before the Board today would be to either:

- A. Direct staff to send a letter in support of moving the current boundary basin to include Lake Shastina, with the condition that Lake Shastina has a seat on the committee. Deadline is March 30, 2018.
- B. Do nothing and not support the adjustment in the boundary lines for the basin.
